Reasons for allowance

The following is an examiner's statement of reasons for allowance:

The instant invention is deemed to be directed to an unobvious improvement to a turbine bucket over U.S. Patent No. 6,722,852 which teaches a turbine bucket including a bucket airfoil having an airfoil shape, said airfoil having a nominal profile substantially in accordance with Cartesian coordinate values of X, Y and Z wherein the Z values are non-dimensional values convertible to Z distances in inches by multiplying the Z values by a height of the airfoil in inches, and wherein X and Y are distances in inches which, when connected by smooth continuing arcs, define airfoil profile sections at each distance Z, the profile sections at the Z distances being joined smoothly with one another to form a complete airfoil shape.

The improvement comprises coordinate values of X, Y and Z set forth in Table I wherein the Z values are non-dimensional values from 0 to 0.938.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Prior Art

Prior art made of record but not relied upon is considered pertinent to Applicant's disclosure and consist of four patents.

Wedlake et al. (6,461,109) is cited to show a turbine bucket including a bucket airfoil having an airfoil shape but fails to teach coordinate values of X, Y and Z set forth in Table I wherein the Z values are non-dimensional values from 0 to 0.938.

Pirolla et al. (6,474,948) is cited to show a turbine bucket including a bucket airfoil having an airfoil shape but fails to teach coordinate values of X, Y and Z set forth in Table I wherein the Z values are non-dimensional values from 0 to 0.938.
